

STANLEY CHEGE THUITA

Open-Source Bitcoin Developer & Systems Engineer

Nairobi & Kisumu, Kenya · altradits@gmail.com · +254 707 172 370 · GitHub: [altradits](#) · LinkedIn: [stanmobitech](#) · Portfolio: [altradits-portfolio.vercel.app](#)

PROFESSIONAL SUMMARY

Software engineer with a mathematics degree, specializing in Bitcoin protocol infrastructure, Lightning Network payment rails, and Go backend systems. Graduate of the Btrust Builders cohort and co-founder of BitDevs Kisumu. Seeking open-source developer grants and engineering fellowships to build full-time on Bitcoin core technologies.

TECHNICAL SKILLS

- **Bitcoin & Lightning:** LND gRPC, BOLT-11 invoices, LNURL-pay, Regtest automation, bitcoin-cli, OP_RETURN transactions, WebLN.
- **Languages & Frameworks:** Go (concurrency, standard library), Ruby on Rails 7 (Hotwire, Solid Queue), TypeScript, React, SQL (PostgreSQL), Bash.
- **Systems & Security:** Docker, Linux, Git workflows, REST APIs, Webhooks, AES-256-GCM encryption, RFC 6238 TOTP authentication.

OPEN SOURCE PROTOCOL CONTRIBUTIONS

minmoto/payment-channels — Contributor

June 2026 – Present

- Added payment channel schemas for East and Southern African corridors using UN M49 geography and ISO standards ([PR #23](#), [PR #24](#)).
- Specified the Ethiopian Telebirr mobile money channel schema with phone validation and payout models ([PR #22](#)).
- Created schema extensions for Western Sahara cash corridors using centralized constructors ([PR #30](#)).

Btrust Builders — Cohort Graduate & Contributor

June 2026 – Present

- Completed the Lightning Bootcamp sponsored by Btrust, Africa Free Routing, and HRF in Addis Ababa, studying routing and channel mechanics.
- Contributed developer milestone and registry profiles to Btrust open-source repositories ([PR #139](#), [PR #186](#), [PR #133](#)).

LIVE DEPLOYMENTS & PROJECTS

YeboBank & Yebente — Community Banking & Settlement

June 2026 – Present

- Built a community banking interface ([yebobank.vercel.app](#)) and payment service ([yebente.onrender.com](#)) bridging mobile money (M-Pesa, Telebirr) to Lightning.
- Wrote an LND client with macaroon credentials and TLS certificates to handle payments and parse BOLT-11 invoices.

BitDevs Kisumu — Co-Founder & Facilitator

April 2026 – Present

- Co-founded Western Kenya's Bitcoin developer community ([bitdevs-kisumu.vercel.app](#)) and hosted technical seminars on Core PRs, BIPs, and Layer-2 routing.

Buna Beta — E-Commerce Platform

July 2026 – Present

- Created a trade portal ([buna-beta.vercel.app](#)) in Rails 7, using background jobs to process mobile payment webhooks and separate order workflows from settlements.

AltSocial & TouchType — Web Applications & Go Tools

April 2026 – Present

- Developed a content scheduling tool ([altsocial-one.vercel.app](#)) with React, Node.js, and Lightning subscription billing.
- Programmed an interactive typing tool ([touchtype-72i6.onrender.com](#)) in standard library Go using mutex synchronization and Docker packaging.

ProofChain & Authentication — Security & Regtest Tools

August 2026 – Present

- Automated local regtest block mining to anchor document hashes onto Bitcoin via OP_RETURN ([github.com/altradits](#)).
- Implemented two-factor TOTP authentication and symmetric encryption from scratch in Go.

APPRENTICESHIP

Zone01 Kisumu — Software Engineering Apprentice

April 2026 – Present

- Completed 158 peer-reviewed programming projects covering Go concurrency, data structures, and containerized deployment.
- Maintained clean Git workflows with branch rebasing, code reviews, and Linux server management.

EDUCATION

University of Nairobi — B.Sc. in Mathematics (Second Class Upper)

Graduated Dec 2021

- Coursework in number theory, linear algebra, abstract algebra, discrete mathematics, probability, and graph theory.
